Profile

As a driven and passionate front-end web developer, I have a natural ability to learn and adapt to new technologies quickly. With expertise in HTML, CSS, JavaScript, and React, I am dedicated to delivering high-quality web applications that provide a great user experience.

Experience

Software Engineer (Instructor)

Timedoor Academy, Cairo, Egypt   June 2022 - Current

• Deliver concepts of coding such as algorithms, loops, variables, functions etc. in JavaScript syntax implemented in simple projects, robots and IoT.

Train students on how to:
• Develop their own website using HTML, CSS & JavaScript for dynamic web applications.
• Design & develop their own mobile applications using React Native.

Projects

Travel & Tourism Agency | HTML, CSS, JavaScript, JQuery, Git, Figma
• Created a travel and tourism website that aimed at showcasing Egypt's beauty
• Used HTML, CSS & Flexbox best practices to implement and responsive layout.
• Wireframed without Dummy Text for accurate modeling and streamlined development.

Uber Cuisine | HTML, CSS, JavaScript, Git, APIs
• Developed an Uber Eats clone with a custom menu using HTML, CSS, and JavaScript.
• Integrated a food API for meal information and improved user experience.
• Demonstrated strong API integration skills with a functional Uber Eats clone.

GitHub Edge | HTML, CSS, JavaScript, Git, Figma
• Created a time-saving search engine for GitHub profiles using the GitHub API.
• Non-profit third-party tool for viewing profiles without opening new tabs.
• Committed to serving the best interests of the developer community.

Memento Memory Game (PWA) | React.js, Firebase, CSS, ServiceWorkers, Git
• ReactJS memory card game with Firebase hosting & ServiceWorker compatibility.
• Utilized CSS for styling, resulting in a visually appealing and fast PWA.
• Developed an interactive and modern memory card game PWA with proficiency.

Education

Bachelor of Computer Science & Engineering

German University in Cairo, Cairo, EG   Oct 2022 - June 2027
